QUARTERLY POTTING SOIL	NUA1705-01	01/17/11 14:00

Comments:

An executed copy of the chain of custody, the project quality control data, and the sample receipt form are also included as an addendum to this report. If you have any questions relating to this analytical report, please contact your Laboratory Project Manager. Any opinions, if expressed, are outside the scope of the Laboratory's accreditation.

This material is intended only for the use of the individual(s) or entity to whom it is addressed, and may contain information that is privileged and confidential. If you are not the intended recipient, or the employee or agent responsible for delivering this material to the intended recipient, you are hereby notified that any dissemination, distribution, or copying of this material is strictly prohibited. If you have received this material in error, please notify us immediately.

Results are reported on a wet weight basis unless otherwise noted

The reported results were obtained in compliance with 2003 NELAC standards unless otherwise noted.

These results relate only to the items tested

Estimated uncertainty is available upon request.

Florida Certification Number: E87358

Subcontracted Laboratories

TestAmerica - Tallahassee, FL (14329)
2846 Industrial Plaza Dr - Tallahassee, FL 32301
Method Performed: 8141A STD Dry
Samples: NUA1705-01
Method Performed: Moisture
Samples: NUA1705-01

DATA QUALIFIERS AND DEFINITIONS

- I** The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
The reported value is between the laboratory method detection limit and method reporting limit.
- J3** The reported value failed to meet the established quality control criteria for either precision and/or accuracy.
Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
- MNR** No results were reported for the MS/MSD. The sample used for the MS/MSD required dilution due to the sample matrix.
Because of this, the spike compounds were diluted below the detection limit.
- RL1** Reporting limit raised due to sample matrix effects.
- U** The compound was analyzed for but not detected
- V** Indicates the analyte was detected in both the sample and the associated method blank.

ADDITIONAL COMMENTS

When insufficient sample volume is received for Matrix Spike and Matrix Spike Duplicate, Laboratory Control Spike and Laboratory Control Spike Duplicate data is used for batch QC.

Results are reported on a wet weight basis unless otherwise noted.

Cooler Received/Opened On 1/18/2011 @ 008:45

NUA1705

1. Tracking # 5717 (last 4 digits, FedEx)

Courier: FEDEX IR Gun ID 96210146

2. Temperature of rep. sample or temp blank when opened: 1.7 Degrees Celsius

3. If Item #2 temperature is 0°C or less, was the representative sample or temp blank frozen? YES...NO...NA

4. Were custody seals on outside of cooler? YES...NO...NA

If yes, how many and where: N/A

5. Were the seals intact, signed, and dated correctly? YES...NO...NA

6. Were custody papers inside cooler? YES...NO...NA

I certify that I opened the cooler and answered questions 1-6 (initial) P.H.

7. Were custody seals on containers: YES NO and Intact YES...NO...NA

Were these signed and dated correctly? YES...NO...NA

8. Packing mat'l used? Bubblewrap Plastic bag Peanuts Vermiculite Foam Insert Paper Other None

9. Cooling process: Ice Ice-pack Ice (direct contact) Dry ice Other None

10. Did all containers arrive in good condition (unbroken)? YES...NO...NA

11. Were all container labels complete (#, date, signed, pres., etc)? YES...NO...NA

12. Did all container labels and tags agree with custody papers? YES...NO...NA

13a. Were VOA vials received? YES...NO...NA

b. Was there any observable headspace present in any VOA vial? YES...NO...NA

14. Was there a Trip Blank in this cooler? YES...NO...NA If multiple coolers, sequence # NA

I certify that I unloaded the cooler and answered questions 7-14 (initial) JH

15a. On pres'd bottles, did pH test strips suggest preservation reached the correct pH level? YES...NO...NA

b. Did the bottle labels indicate that the correct preservatives were used YES...NO...NA

16. Was residual chlorine present? YES...NO...NA

I certify that I checked for chlorine and pH as per SOP and answered questions 15-16 (initial) JH

17. Were custody papers properly filled out (ink, signed, etc)? YES...NO...NA

18. Did you sign the custody papers in the appropriate place? YES...NO...NA

19. Were correct containers used for the analysis requested? YES...NO...NA

20. Was sufficient amount of sample sent in each container? YES...NO...NA

I certify that I entered this project into LIMS and answered questions 17-20 (initial) JH

I certify that I attached a label with the unique LIMS number to each container (initial) JH

21. Were there Non-Conformance issues at login? YES...NO...# Was a PIPE generated? YES...NO...#

Job Narrative
640-31767-1

Comments

Report revision includes the removal of the additional Method 8141A QC data for coumaphos in batch 640-76869.

Receipt

All samples were received in good condition within temperature requirements.

GC Semi VOA

Method 8141A: A full list spike was utilized for this method. Due to the large number of spiked analytes, there is a high probability that one or more analytes will recover outside acceptance limits. The laboratory control sample duplicate (LCSD) sample associated with batch 640-76869 had fensulfothion outside control limits high; therefore, re-extraction/re-analysis was not performed. Method criteria was met for full list spikes. Project and QC data was flagged "J3".

Method 8141A: The matrix spike/matrix spike duplicate (MS/MSD) recoveries and/or %RPD (precision) for batch 640-76869 exceeded advisory limits for several target analytes. Project sample, NUA1705-01, was used for the batch matrix spikes. QC data was flagged "J3".

Method 8141A: The method blank in batch 640-76869 contained monochrotophos above the method detection limit (MDL). This target analyte concentration was less than the practical quantitation limit (PQL); therefore, re-extraction and/or re-analysis of samples was not performed. Associated project data was flagged "V".

Method 8141A: The percent recovery of monochrotophos in the initial calibration verification (ICV) standard exceeded the 70-130% range. Channel one was at 150% and channel two was at 153%. The following continuing calibration verification standard (CCV) recovery was acceptable. Monochrotophos has been identified as a poor performing analyte when analyzed using this method.

No other analytical or quality issues were noted.

Organic Prep

No analytical or quality issues were noted.

DATA REPORTING QUALIFIERS

Client: TestAmerica Laboratories, Inc

Job Number: 640-31767-1

Sdg Number: NUA1705

Lab Section	Qualifier	Description
GC Semi VOA	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
	U	Indicates that the compound was analyzed for but not detected.
	V	Indicates the analyte was detected in both the sample and the associated method blank.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
